Your data management ally

ally

The web-based Vigilant Centerium platform provides your team with wireless connectivity between the family of Agilia® Connect pumps and Vigilant Master Med and Vigilant Insight software, enabling centralized distribution of drug libraries and warehousing of infusion data for reporting and analysis.

Technically **Packed with powerful cybersecurity**

Built to state-of-the-art cybersecurity practices, the confidentiality and integrity of all infusion-related data that moves through Vigilant Centerium has been confirmed through an independent vulnerability test by a 3rd party testing lab.¹

Functionally **Refined for intuitive operation**

Vigilant Centerium's anytime, anywhere access and user-friendly interface helps ease your team's initial training and everyday use.

Practically **Engineered for infrastructure efficiency**

Vigilant Centerium has been designed to allow your team to maintain an optimal network load – even for 4500 pump – by fine-tuning communication frequency to best balance data availability needs and wireless bandwidth.

Exceptionally **Supported to drive best practices**

From initial implementation to ongoing maintenance and repair, our technical and clinical service team shows your users how to put Vigilant Centerium to best use, so they can get started quickly and work confidently.

1. Data on file.

Dedicated Team of Experts

- Account Manager
- Project Manager
- Clinical Pharmacy Services Liaison
- Clinical Nurse Liaison
- IT Service Liaison

SCP certification, 10 years running

Our technical team's commitment to annual certification by the global standard in field service quality – Service Capability & Performance (SCP) – whose audits cover a broad scope of practices, ensures installation and training, as well as ongoing service, are provided by individuals with deep knowledge.

Export all pump and infusion data in **XLS** for customized reporting

Optimize infusion management

Centralized Information comes from Agilia® Connect pumps for analysis and reporting.

At-a-glance data visualizations helps to focus on pumps that may not have received the latest drug library update or communicated their most recent infusion information.

Virtualization can be enabled through Vmware ESX and Vmware Sphere environments.

Enhance fleet monitoring

Status monitoring of all installed Agilia Connect pumps.

Test, training & production environments can be created within a single instance of the software.

Implement advanced cybersecurity

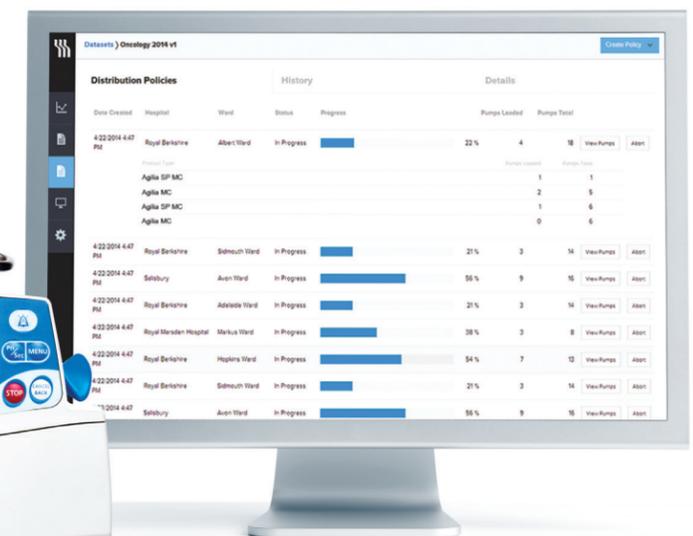

Mutual Authentication using Pre-Shared Key (PSK) with TLS1.2 using AES128 (encryption) and SHA-256 (data integrity)

Controlled user access integrated with MS Active Directory.

Digital certificates for secured communications with other applications.

Large single-instance capacity **4,500 pumps²**

Simple to integrate with your organization's IT systems.

SCP is a registered trademark of Service Strategies.

Globally **Recognized as a proven partner**

Fresenius Kabi's medical device division is a leader throughout the world, with more than 35 years of infusion technology experience and an installed fleet of more than a million infusion pumps.

Fresenius Kabi is also a steadily-growing force in the North American generic injectables space, having worked shoulder-to-shoulder with acute- and alternate-care institutions over the last decade to help ensure the availability and affordability of essential IV drugs for anesthesia and analgesia, critical care, and oncology.
