

# Vigilant Insight

Continuous Quality  
Improvement software  
for infusion

Part of the **Agilia® Connect** Infusion System

# Your performance ally

The Vigilant Insight Continuous Quality Improvement software automatically pulls infusion data from the Vigilant Centerium platform, configuring it into easy-to-digest reports. It's a tool that enables your team to conduct their own independent performance analyses – and an ally in determining how to efficiently and effectively reach your infusion practice and patient safety goals.

## Functionally Refined for intuitive operation

The user-friendly interface of the web-based Vigilant Insight software encourages both your team's initial adoption and ongoing use.

## Practically Programmed with "ready-to-read" reports

Your team can easily leverage Vigilant Insight analyses to determine where and how to best revise drug policies and protocols, refocus user training programs, reconfigure pump parameters, or reallocate the fleet to increase safety – all while reducing costs and optimizing your drug protocols.

## Exceptionally Supported to drive best practices

Detailed training and workshops get your team started quickly and confidently, familiarizing everyone with the location and purpose of all dashboards and reports – and the actions they imply – while follow-on consultation services support groups looking to take deeper dives into their data for more complex opportunity assessments and recommendations.

### Dedicated Team of Experts

IT Service Liaison

### SCP certification, 10 years running

Our technical team's commitment to annual certification by the global standard in field service quality – Service Capability & Performance (SCP) – whose audits cover a broad scope of practices, ensures installation and training, as well as ongoing service, are provided by individuals with deep knowledge.

Easy-to-digest information

10 pre-defined reports

#### Available reports

1. Infusion Listing
2. Alert Listing
3. Alarm Listing
4. Override Listing
5. Reprogram Listing
6. Cancelled Infusion Listing
7. Direct Bolus Listing
8. User Pause Listing
9. Hard Limit Override Listing
10. Device Utilization by location

**Web-based, on-demand software** provides access to procedure data that can be programmed to update as often as every minute.

**Simple dashboards and trend reports** enable monitoring of overall Drug Library, Basic Profile, and Drug X use ratios.

**Customizable graphical and tabular visualizations** provide at-a-glance data, from an organization to an individual pump level, for any date range.

**Hover tools and hyperlinks** reveal detailed information about specific data points and enable you to drill down to the unit, pump, infusion record level and review frequency of Drug X and overrides.

## Globally **Recognized as a proven partner**

Fresenius Kabi's medical device division is a leader throughout the world, with more than 35 years of infusion technology experience and an installed fleet of more than a million infusion pumps.

Fresenius Kabi is also a steadily-growing force in the North American generic injectables space, having worked shoulder-to-shoulder with acute- and alternate-care institutions over the last decade to help ensure the availability and affordability of essential IV drugs for anesthesia and analgesia, critical care, and oncology.
